```c
/**
 * List the first 25 Fibonacci numbers
 */

#include <stdio.h>

int main(void)
{
   // Declare an array and store the first two fibo numbers
   int fibo[25];
   fibo[0] = 1;
   fibo[1] = 1;

   // Fill in the rest
   for (int i = 2; i < 25; i++)
   {
       fibo[i] = fibo[i - 1] + fibo[i - 2];
   }

   // Print the array
   for (int i = 0; i < 25; i++)
   {
       printf("%i\t", fibo[i]);
   }
   printf("\n");
}
```
